# Cybil - next steps session

We highly appreciate your input - please answer the questions during the session.

3

# 1. How has Cybil helped you in your cyber capacity building journey?

1 Draft a project proposal

4 Plan a capacity building activity

1 Find a tool that helped my decision-making building capacity in my country

7 Carry out my research

2 Find actors who could help with funding/implementation

5 Identify collaborators

5 Do a scoping of cyber capacity building activity

2 Find events important to attend

3 Find out what the current best practices are

**6** To increase my knowledge about cyber capacity building

👤 13

A. Length of Projects by Theme & Topic

B. Number of Projects per Theme & Topic

C. Number of projects per Topic vs Total number of projects

D. Timeline with projects added to Cybil on different Themes & Topics

E. Number of projects around the world by Funder

2. Which visualizations would you like to see on Cybil?

3. What additional features would you most like to have on Cybil?

Interactive map

A way to match projects with funding opportunities by topic or geographical area

Request for Information function, ability to ask for information

Info to reach out to projectleads

Curated list out noteworthy projects or best practice examples. Maybe adding/highlighting one project per month

An API so you do't need to manually click export data.

You can propose an edit to project info by making a change on the screen and hitting submit.

Integration with Zapier

More repositories like Covid-19

11

3. What additional features would you most like to have on Cybil?

Ability to find partners (e.g. across the globe) for ongoing/prospective projects.

By highlighting the benefits and opportunities that Cybil offers for people/institutions that work on CCB

11

4. How can we improve that Cybil is owned by the global community?

A meeting every few months with the community to discuss Cybil and content curation

Better marketing and promotion of the platform, providing practical examples of how the global community can use it and benefit from it

Involve the community by decisions on the content that is put on cybil and big decisions.

By highlighting the benefits of cybil to institutions and people who work on CCB

Is the Cybil Oversight Group a committee within the GFCE structure?

A blog feature where members of the community could submit their contributions to be published

Highlighting the practical benefits of the portal and encouraging more to actively participate
